Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1850 Excerpt: .in constant unison with the varying fluctuations of the atmosphere. In measuring altitudes by the arenoid the same rules for calculating the heights hold good as with the barometer; but in the present imperfect state of the instrument the precaution appears necessary to be attended to of ascertaining by trial the actual value in feet of the graduations on the dial; and also the effect produced upon these results by any change of temperature; as different instruments will be found to vary in these particulars. The very limited range of the instrument, as at present constructed--only 2 5 inches below 30--confines its power of measuring altitudes to about 2000 feet above the sea. The sketch below of the interior of the aneroid, the dial plate being supposed to have been removed, is taken from an extract from Mr. Dent s treatise on the instrument in the Aide Memoire. D D is the cylindrical vacuum box; C C the lever, to the end of which is attached the vertical rod i, connecting it with the other levers acting by means of a piece of watch spring upon the roller carrying the index hand. An alteration in the distance of leverage to regulate the movement of this hand, so as to correspond with the scale of a mercurial barometer, is managed by means of the screws e and b. The position of the hand is made to coincide with the indication of a barometer by means of the...
