Mathematical Analysis and Numerical Methods for Science and Technology

By Dautray, Robert / Lions, Jacques-Louis

Book Condition: New. Publisher/Verlag: Springer, Berlin | The advent of high-speed computers has made it possible for the first time to calculate values from models accurately and rapidly. Researchers and engineers thus have a crucial means of using numerical results to modify and adapt arguments and experiments along the way. Every facet of technical and industrial activity has been affected by these developments. The objective of the present work is to compile the mathematical knowledge required by researchers in mechanics, physics, engineering, chemistry and other branches of application of mathematics for the theoretical and numerical resolution of physical models on computers. Since the publication in 1924 of the "Methoden der mathematischen Physik" by Courant and Hilbert, there has been no other comprehensive and up-to-date publication presenting the mathematical tools needed in applications of mathematics in directly implementable form. | VIII. Spectral Theory.-1. Elements of Spectral Theory in a Banach Space. Dunford Integral and Functional Calculus.- 1. Resolvant Set and Resolvant Operator. Spectrum of A.- 2. Resolvant Equation and Spectral Radius.- 3. Dunford Integral and Operational Calculus.- 4. Isolated Singularities of the Resolvant.-2. Spectral Decomposition of Self-Adjoint and Compact Normal Operators in a Separable Hilbert Space and Applications.- 1. Hilbert Sums.-...
