That they are particles of quartz cannot be doubted; but to suppose them combined with oxygen is contrary to all experience; for these stones never shew any disposition to combine with oxygen even when exposed to the most violent heat. La Metberie made experiments on purpose to see whether Lamanon s opinion was well founded; but they all turned out unfavourable to it. And Monge ascertained, that the particles described by Lamanon were pure crystal unaltered, with a quantity of black powder adhering to them. He concludes, accordingly that these fragments had been raised to so high a temperature during their passage through the air, that they set Are to all the minute bodies that came in their way f. The emission of the light is accompanied by a very peculiar smell, having some analogy to...
