RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 52 pages. OCLC Number: 53784246 Excerpt: . . . Figure 1: Department of Defense Disposal Process Source: Our analysis of Defense Reutilization and Marketing Service data. Defense reutilization facilities accept most items, including those that pose 6 health and environmental risks and those built for military purposes. 7 Hazardous property may be reused, but its transportation, storage, use, and disposal are subject to federal and state laws and regulations. Examples of hazardous property include motor oil, paint, and freon from air conditioners. Department of Defense policy also calls for identifying 8 and demilitarizing or imposing trade limits on items that have a significant military technology application before they are released from the Departments control. Trade security controls are designed to preclude the transfer of items with a significant military technology application to any entity whose interests are counter to those of the United States. Examples 6 Certain items, such as classified material and ammunition, are disposed of by other means. 7 The Department defines this as any substance that may be hazardous to human health and the environment and whose use or disposal is regulated by federal and...
