Createspace. Paperback. Book Condition: New. This item is printed on demand. Paperback. 166 pages. Dimensions: 9.0in. x 6.0in. x 0.4in.Local nurseryman, Paul Dowlearn, of Wichita Valley Landscape and Nursery, has published his book, The Lazy Mans Garden: Maximum return; Minimum input. The book focuses, as the title suggests, on minimal effort in gardening and yard care with a quality output. Dowlearn writes, Americans are intensively growing millions of acres of lawn grasses. We are also attempting to grow mostly non-native exotic hybrids for ornamentals. Much of this traditional culture is not sustainable. Vegetable gardening is one of the few things that survived our landscaping ethic to give the homeowner benefits that go beyond aesthetics. Utilizing native plants, creating habitat for wildlife, and seeking out old tried and true heirloom plants are current trends that promise a more relaxed, eco-friendly style. Homeowners today are demanding low water, low maintenance, and plants that dont need to be replaced on a seasonal basis. The landscaping industry has been slow to respond. Although there are a growing number of landscape professionals who share the viewpoint of the author, they are, unfortunately still in the minority. How far will the 20th Century horticulture and agriculture regimes carry us into the 21st Century Are we really getting our moneys worth out of our landscaping investment Are all these different fertilizers, chemicals, and hardware truly necessary Not so, says The Lazy Man. Follow the journey from where weve been, where we are, to where we are going with a lifetime gardener, landscaping veteran, and naturalist. Read on. This item ships from La Vergne,TN. Paperback.
