Reviews

An exceptional ebook along with the typeface employed was intriguing to see. It really is simplistic but surprises within the fifty percent of the ebook. It is extremely difficult to leave it before concluding, once you begin to read the book.

The first one is institutional and concerns the frontiers of the Union and thus the number of potential regions. The second one is economic, and makes it necessary to choose between, on the one hand, the need to strengthen the European growth poles (especially the metropolitan regions) in order to compete successfully with the Triad and the Asiatic countries and, on the other, the obligation to ensure harmonious development and to distribute the structural funds more evenly or even to concentrate them in the Eastern countries and the less favoured regions characterized by atonic growth. In other words, the choice facing the European Commission reflects the crucial dilemma between size and integration and between equity and growth. In terms of territorial prospective and management, four main scenarios must be compared and their impacts must be estimated: the strengthening of concentration, the diffused metropolization, the increase of regional inequalities and the polycentrism. This is the main reason why the question of European regional convergence is now attracting considerable attention, since polarization phenomena and specific regional trajectories are challenging the hypothesis of automatic catch-up within the European Union over nearly two decades. This interest is further compounded by the huge challenge of integrating the ten new Eastern countries, two other candidates in 2007 (Bulgaria and Romania) and probably several other ones in the near future (especially Croatia, but also Moldavia and Ukraine and, perhaps, Turkey). For regional policy-makers, the main concern is to make monetary integration successful, to moderate the divergent forces and to stimulate the lagging territories. This study of...
